

# Cableyoyo

ULTRA-THIN CORD MANAGEMENT

# HAVE YOU EVER NOTICED HOW ALL THOSE SMALL CORDS SUPPLIED WITH YOUR ELECTRONIC EQUIPMENT COME IN SIX-FOOT LENGTHS (1.8M)?

Probably six times what you actually need for connecting your laptop to your favorite device! And the result; a massive messy knotted tangle. Sometimes even damage.

## PROMOTE YOUR BRAND /

Cableyo is an innovative and extremely useful product that almost everybody can use to help clean up their excess small cords. With a big enough surface to print a custom logo and short message, this product is a memorable way to promote your company.

**PERFECT FOR MANY INDUSTRIES**, we have provided a few sample applications above. Available in white and black.

Cableyo is an ingenious empty spool around which to wrap existing cords. It will take all low voltage chargers, USB, firewire, data and telephone cables up to 5mm (quarter inch) in diameter.

Cableyo also comes with an adhesive spindle. Stick this, say, to the back of a screen, under a desk, and then you can snap on and off the Cableyo whenever required elsewhere. They can even be stacked two-up by fixing the spindle to one of the Cableyos. An excellent way for always keeping cables together.

Two small inbuilt clasps hold the cord at just the right length when coiled.
