

POP

TINY CORD WINDER WITH SUCTION CUP

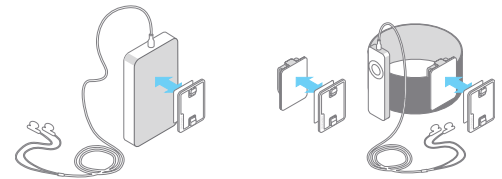

EARBUDS ALWAYS TANGLE. Whether carrying an iPod, MP3 player or cell phone, everybody experiences this problem. This is exactly why we created POP, an easy to use cord winder. It simply suctions onto the back of most such devices to easily wrap and protect the cords. It really is that simple and safe. No more frustrating tangles or knots!

Designed for all situations, the POP adapts to however the iPod is carried or worn. If a protective case for the iPod is already used, there are two possibilities; adhere the provided gloss plate to the case to create a smooth surface onto which to suction the POP, or use the belt clip (supplied) and suction POP. The cord winder is then independent of the iPod. The POP belt clip also snaps on to an armband, bag strap, belt or even simply directly onto the iPod case. Available in white and black

HOW IT WORKS /

POP is easy to remove from the iPod by simply tugging the small tab on the suction cup. It leaves no marks when removed.

POP on iPod or belt clip

PROMOTE YOUR BRAND /

Customize the Cableyoyo Pop by creating your own decals. Each decal is printed in a four color process without creative limitations. Perfect for many industries.
